Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, and 18-27, drawn to controlling of data to a network with different information types, classified in class 370, subclasses 230, 490, 487, and 430.
 - II. Claims 11-17, and 28-34, drawn to minimizing the cost of the network, classified in class 370, subclasses 238, and 252.
 2. Inventions I, and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention I is directed to controlling of data to a network with different information types; the invention II is directed to minimizing the cost of the network. Therefore the inventions I, and II have different functions and different effects.
 3. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups, restriction for examination purposes as indicated is proper.
 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- The inventions are distinct, each from the other because of the following reasons:
